***The Religious Factor in Conflict and Peacebuilding:  
The Potential of Religious Communities in Ukraine***

With commentary by

**Robert Hayden,**

Professor Emeritus of Anthropology and Law and Public & International Affairs,  
University of Pittsburgh, United States

Work in Progress

---

The aim of this study is to explore the peacebuilding potential of Ukrainian religious communities by focusing on individual communities in two target areas (Volyn and Donbas). We identify opportunities for peace and the destructive influences of religion on the social and political situation during armed conflict. What is the connection between religion and war? Is it possible to talk about a theology of peace and how? We will link the Ukrainian case to issues within the global context.
